

INFLATION EXPECTATIONS SURVEY TO THE PRIVATE PANEL OF ANALYSTS - EEI -

NOVEMBER 2007

The Inflation Expectations Survey to the Private Panel of Analysts is done monthly in order to obtain the opinion of national and international analysts, knowledgeable of the operational procedures of the monetary policy, in relation to the expected evolution in the prices of the economy. Said survey is extremely useful, given the importance that the inflationary expectations have in the behavior of the general level of prices.

In the first part of this note we present the results of the survey of inflation expectations, made between the second and fourth week of November of 2007.

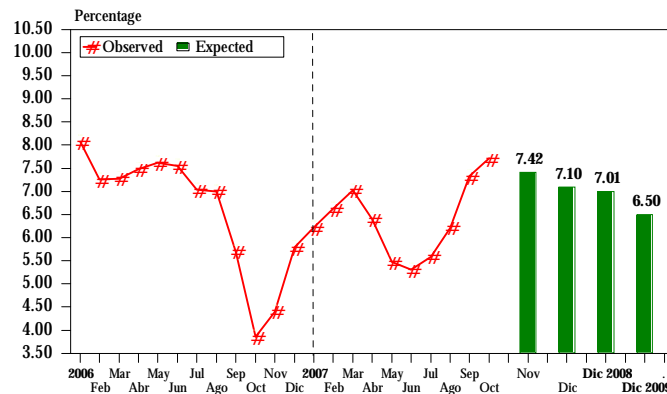

In the second part the confidence index of economic activity is presented, which was made based on the referred survey.

I. INFLATION EXPECTATIONS AND ECONOMIC ACTIVITY

1. INFLATION

The Economic analysts surveyed foresee an inflationary rhythm of 6.68% for September 2007, while for December 2007 it is estimated that it will reach 7.10%. For the end of 2008 and 2009 of the economic analysts project an inflation of 7.01% and 6.50%, in their order.

In November of this year, the trust index level of the economic activity¹ was at 50.00, index higher by 18.51%, regarding the registered the month before (42.19) and lower by 28.89% regarding the observed in November the previous year (70.31).

TRUST INDEX OF THE ECONOMIC ACTIVITY JANUARY 2006 - NOVEMBER 2007

FUENTE: Encuesta de Expectativas de Inflación al Panel de Analistas Privados.

¹ The index is made based on four questions. Their calculation is derived from considering sub-indexes for each question, same that result from the balance of answers that are obtained subtracting, for each question, the percentage of positive answers, the percentage of negatives and add a constant of 100, with the purpose of avoiding negative quantities. The sub-indexes obtained this way for each question are averaged and the trust index results from expressing said average value as a percentage of the maximum possible average.
